

TOKI MOHAMMAD TAHMID

Civil Engineer & Project Coordinator

tahmid.ce.08@gmail.com — +358 449 517 644 — Turku, Finland

[linkedin.com/in/toki-mohammad-t-a7b334159](https://www.linkedin.com/in/toki-mohammad-t-a7b334159)

PROFESSIONAL SUMMARY

Civil Engineer and Project Coordinator with 6+ years managing complex infrastructure projects, specializing in data-driven project management, process optimization, and cross-functional team coordination. Proven track record managing 700+ technical documents, implementing systematic workflows that reduced delays by 25%, and leading quality assurance across high-stakes construction projects. Currently expanding skills in data science and AI tools. Seeking to apply technical expertise, analytical mindset, and process optimization experience to challenging roles in technology-driven organizations.

PROFESSIONAL EXPERIENCE

QS Engineer

August 2023 – April 2025

Fervent Multiboard Industries Ltd.

Dhaka, Bangladesh

- Centralized documentation system for 700+ technical documents, creating searchable database that reduced document retrieval time by 60% and eliminated version control errors
- Coordinated civil construction workflow across 5 teams (15+ members), implementing progress tracking system that improved on-time milestone completion by 35%
- Developed automated cost comparison framework analyzing 20+ construction techniques, resulting in 12% cost savings through data-driven recommendations and detailed BOQ/BBS analysis
- Generated daily and weekly progress reports with KPI dashboards, conducting construction audits that identified 50+ compliance issues with 95% resolution rate
- Collaborated with Construction Manager on project scheduling using critical path analysis, optimizing resource allocation and reducing project delays by 25%

QA/QC Engineer

April 2019 – April 2022

Italian-Thai Development Public Company Limited

Dhaka, Bangladesh

- Led quality control for 200+ pile caps and 180m concourse slab with 88 columns for metro station infrastructure, ensuring zero safety incidents and 98% first-pass inspection rate
- Implemented systematic quality documentation process, organizing inspection records and quality metrics for compliance with international standards (ISO, AASHTO)
- Conducted 100+ construction audits, issuing Non-Conformance Reports (NCRs) and reducing defect rates by 40% through root cause analysis and corrective action tracking
- Coordinated multi-disciplinary teams (architectural, structural, plumbing) ensuring seamless integration across 8 concurrent work streams with minimal conflicts
- Supervised rebar fabrication, formwork, and concreting activities ensuring structural stability and load-bearing capacity across large-scale infrastructure

Structural Design Engineer

April 2022 – August 2023

Puradesta Prakawshali

Dhaka, Bangladesh

- Performed structural analysis and design for bridge projects using Midas Civil software, ensuring AASHTO LRFD and BNBC 2020 compliance through rigorous validation

- Created 50+ technical AutoCAD drawings and comprehensive design specifications, collaborating with stakeholders to integrate design solutions with project requirements
- Conducted complex dynamic load analysis including flutter and vortex shedding calculations for cable-stayed bridges, enhancing structural safety under varying load conditions
- Developed detailed design reports and calculations for prestressed concrete box girders, I-girders, and RCC structures ensuring structural integrity

Geotechnical Engineer

Delight Engineers & Consultants Ltd.

April 2022 – March 2023

Dhaka, Bangladesh

- Conducted geotechnical investigations including 30+ Standard Penetration Tests (SPT), analyzing soil data to inform foundation design decisions with 100% accuracy
- Applied AASHTO LRFD BDS standards to calculate bored pile capacity and prepared detailed subsoil investigation reports providing critical recommendations for structural stability
- Supervised drilling operations coordinating with project managers and contractors, ensuring timely delivery of geotechnical data for design teams

Jr. Structural Design Engineer

Puradesta Prakawshali

August 2016 – March 2019

Dhaka, Bangladesh

- Assisted in preparing detailed bridge component drawings and specifications using AutoCAD, ensuring adherence to design standards
- Conducted structural analysis using Midas Civil and hand calculations to assess load-bearing capacity and integrity of bridge components
- Participated in site visits and inspections to monitor construction progress and support resolution of construction-related issues

TECHNICAL SKILLS

Data Analysis: Microsoft Excel (Advanced - Pivot Tables, VLOOKUP, Data Visualization), Data Management, Cost Analysis, Quantitative Analysis

Engineering Software: Midas Civil, AutoCAD, Project Management Tools, Documentation Management Systems

Technical Expertise: QA/QC Processes, Engineering Design, Risk Assessment, Compliance Auditing, Technical Documentation, Process Optimization

Project Management: Cross-functional Coordination, Stakeholder Management, Resource Allocation, Critical Path Analysis, Workflow Optimization

Standards & Compliance: AASHTO LRFD BDS, BNBC 2020, ISO Standards, Quality Management Systems

Currently Learning: Python, Data Science Fundamentals, AI Tools

Languages: English (Professional), Finnish (Elementary), Bangla (Native), Hindi (Limited), Urdu (Limited)

EDUCATION

Bachelor's Degree in Civil Engineering

Ahsanullah University of Science and Technology

2012 – 2017

Dhaka, Bangladesh

ACHIEVEMENTS

Kongsberg Maritime Challenge, Since AI Hackathon 2025 – Participant demonstrating problem-solving and rapid prototyping skills

Tech Community Engagement – Active participant in Southwest Finland tech ecosystem, regularly attending AI workshops and tech meetups to expand knowledge in data science and AI applications
