Toki Mohammad Tahmid

Civil Engineer | Construction QA/QC, Document Control and Site Support

PROFILE

Civil engineer with 6+ years across construction QA/QC, technical inspection, document control and project coordination on metro-station and industrial-facility projects. Experience includes reinforced-concrete inspections against approved drawings and specifications, ITP and test records, NCRs and corrective-action follow-up, and control of 700+ drawings and technical records under revision control. Based in Turku and looking for QA/QC, document-control or entry-level construction site work while I complete a Finnish-language construction course.

QA/QC AND TECHNICAL SKILLS

- Site QA/QC: reinforced-concrete inspection, reinforcement, formwork, concreting, ITPs, test records and approved-drawing checks
- Quality issues: NCRs, observations, root-cause reviews, corrective actions through closure; quality-audit support
- Site interfaces: structural and architectural works, civil infrastructure, MEP coordination on metro and industrial sites
- Document control: 700+ drawings and technical records under revision control; method statements, issue logs and reports
- Tools: Excel, M365, AutoCAD, Midas Civil and ETABS (structural-design exposure); AASHTO LRFD and BNBC 2020

SELECTED EXPERIENCE

QS Engineer & Project Coordinator — Fervent Multiboard Industries Ltd., Bangladesh

August 2023 – April 2025

- Coordinated site, design, procurement and subcontractor interfaces on a large industrial facility across five teams and 15+ personnel; controlled revisions of 700+ drawings and technical records.
- Prepared method statements, progress reports, quantity reviews, issue and audit records; followed site issues and corrective actions to closure.

QA/QC Engineer — Italian-Thai Development Public Company Limited, Bangladesh

April 2019 – April 2022

- Inspected metro-station pile caps, columns and slabs, reinforcement, formwork and concreting against approved drawings and specifications; maintained ITPs, inspection/test records and NCRs, following corrective actions to closure.
- Coordinated structural, architectural and MEP interfaces; supported site quality audits and root-cause reviews.

Cleaner / Room Attendant — N-Clean, Turku, Finland

May 2026 – present (part-time, permanent from October 2026)

Ship cabin and common-area cleaning to hygiene and quality routines in a time-sensitive operation.

Structural Design Engineer / Junior Design Support — Puradesta Prakawshali, Bangladesh

August 2016 – March 2019; April 2022 – August 2023

Bridge and civil-infrastructure calculations, drawings and specifications using Midas Civil and AutoCAD; ETABS exposure in structural design.

EDUCATION

BSc Civil Engineering, Ahsanullah University of Science and Technology, Bangladesh (2012–2017).

Turku AKK construction programme, August 2026 – ongoing, taught in Finnish.
